With over 2.1 billion people, our community is growing rapidly, and at this scale we cannot fulfill our mission without cutting edge Artificial Intelligence (AI) systems that operate at unprecedented scale. Facebook's AI PMs work with industry's leading researchers, engineers, designers, and data scientists to build deeper and richer understanding of all content and people across Facebook's family of apps. And apply this understanding to solve the company's hardest problems including showing more relevant content and ads on Facebook and Instagram, keeping people safe by reducing misinformation and hateful content, and powering Facebook's latest VR/AR products.

If you're passionate about driving the next set of AI breakthroughs that will make people lives better, we want to talk to you.

Competitive Salary including the following benefits apply: Medical Benefits, Dental Benefits, Vision Benefits, Pension Benefits , Life Assurance, Childcare, Benefits, Gym Benefits, Transport benefits, Laundry Benefit

### PRODUCT MANAGER - ARTIFICIAL INTELLIGENCE (AI) RESPONSIBILITIES

Build the vision, strategy, and roadmap of AI big-bets that Facebook should invest in to drive step change impact for our products.

Shape the direction of Facebook's core products by applying cutting edge AI innovations to tackle people problems such as reducing integrity issues, making content and ads more relevant, and improving search amongst many others.

Build new AI technologies, services, and platforms for areas such as computer vision, NLP, speech/audio, and personalization that operate at Facebook scale and power all Facebook products.

Accelerate time to impact for new technologies through experimentation, prototyping and strong execution.

Have a clear pulse on innovations across the broader AI community and help us identify new opportunities and look around corners.

Identify and track key success metrics for all of your products.

Be world class with running conclusive experiments quickly to validate hypotheses.

#### MINIMUM QUALIFICATIONS

3+ years product management experience, including delivery of entire products start to finish

Experiences in applying machine learning (ML) technologies such as computer vision, NLP, speech/audio, knowledge of products or building personalized experiences.

Communication experience with experience conveying technical topics to the audience

Execution experience to drive multiple projects.

Strategic thinker who can help craft plans to multiple stakeholders.

Collaboration experience.

#### PREFERRED QUALIFICATIONS

Experience developing social products, technologies, and platforms

Experience building new AI/ML technologies

Bachelors Degree

Facebook's mission is to give people the power to build community and bring the world closer together. Through our family of apps and services, we're building a different kind of company that connects billions of people around the world, gives them ways to share what matters most to them, and helps bring people closer together. Whether we're creating new products or helping a small business expand its reach, people at Facebook

are builders at heart. Our global teams are constantly iterating, solving problems, and working together to empower people around the world to build community and connect in meaningful ways. Together, we can help people build stronger communities — we're just getting started.
