Senior Lead Healthcare Architect (Watson Health Services)

Your Role and Responsibilities

As Senior Lead Healthcare Architect you will be responsible for designing the next generation solutions for IBM Watson Health Services clients. As a key member of the WH Services team, fulfilling this role will require working with key members of the WH Services and IBM teams to help healthcare clients define and progress their journey, through areas such as: Cloud Architecture and Technology, Enterprise Analytics, Workflows and Organization Change, Methodologies such as the Garage Method, Data Science and Governance, Emerging Innovation such as AI and Machine Learning. As Senior Lead Healthcare Architect you will be working with a multi-disciplinary team of client and project resources to define, develop and deliver complex solutions. The dynamic, startup culture of Watson Health Services reflects the agility that IBM must exhibit in the fast changing world our clients experience in their business and the fierce competitive and innovative environment. You will work with strategy consultants, cloud architects, developers, agile managers to design or develop reusable assets to support our client's journey, optimizing their performance, engaging their patients-consumers, enabling effective care and manage population health.
