Artificial Intelligence / Machine Learning Solution Architect - London

jobs.capgemini.com/gb-en/job/London-Artificial-Intelligence-Machine-Learning-Solution-Architect-London-LND/603124401/

The focus of your role

The Capgemini Financial Services Strategic Business Unit (FSSBU) is looking to recruit a number of Solution Architects who specialise in Artificial Intelligence (AI) and Machine Learning (ML).

We are keen to hear from you if you have deep data science, platform build and architecture experience.

This is an exceptional opportunity to accelerate your career, work with some of the world's leading financial services institutions and influence the future of banking.

What you'll do

- Elaborate the Intelligence Hub architecture in relation to data science capabilities – what AI/ML tools should be part of the technical stack and what use cases each tool would cover?
- Explore, assess and propose analytics tooling based on business requirements
- Prepare and present AI/ML Tooling architecture stack to required governance bodies
- Define and drive Proof of Concept activities for chosen tooling
- Work with our client's global businesses/functions on common solutions, identifiying re-use opportunities
- Work closely with the data science community
- Have accountability to the Intelligence Hub Lead Architect for all activity

What you'll bring

- Data science, Machine Learning & Artificial Intelligence experience
- A strong background in IT Solution Architecture is essential
- Deep data science and platform build/architecture experience
- Proven strength in conceptual and logical thinking, ability to abstract information and look at the bigger picture
- Ability to articulate and present solutions at the right level for a wide audience.
- Building relationships and networking, with high levels of motivation and collaboration
- Experience of working within a large, complex and geographically dispersed Programme
